Registering on the 4sale Classifieds site is a 3 step process.

The first step is to login using your NAWCC Login, which uses your email address and a password (see below for the password I have assigned you).

Go to http://4sale.nawcc.org and login using the blue NAWCC LOG IN button.

Your NAWCC Login username is
Your password is

Once you have logged in with the NAWCC Login you can then proceed with the second step of Registering.

The Registration page will open up.

The page may request that you select a membership option.

Click the radio button and then click on submit.

A new page will open.

Your required information should already be there.
(only the boxes next to the words in blue are required)

You will also have to enter the strange letters in the box.

At the bottom of the page you are requested to enter a Username and a Password and confirm the password. Use the same password you use to log onto the NAWCC site.

This may be confusing because this username and password are used by the 4sale Classifieds program to identify you. Think of it as a display name for others when they are viewing your items listed for sale.

Since you are an NAWCC member you should always use the blue NAWCC LOG IN button to access the 4sale site (as well as the main NAWCC site and the Message Board).

Accept the terms of use and click on the Submit button.

You will then receive a confirmation email to which you need to reply (instructions are in the email).

Then you can login to the 4sale site.

PS – If you keep getting a question in the Security Warning Box you can turn that off by doing the following:

Click on Tools at the top right of the Internet Explorer Browser Page.
A drop down menu will appear.

At the bottom of that menu click on Internet Options.
A box will open up with tabs across the top.

Select the Security tab, then at the bottom of that box click on Custom level.

A list of options will display.

Go to the Miscellaneous section and scroll down to the Display mixed content option.

Enable that option by clicking in the radio button presented.

Now click OK to save and close the box and then click OK to close the Internet Options box.

You shouldn't be prompted with the question any longer.
