At the National Convention held in Asheville, North Carolina, in 1964, a “Terry Seminar” was held. Willard Hirsh was the moderator, and Fraser Forgie acted as the coordinator of the four papers which were read. It was felt that these papers were so worthwhile that they should be presented to the entire membership through the medium of the BULLETIN. There were no pictures presented with the Ingraham, Losch, and Pritchett papers. Color slides were shown with the Forgie-Wadleigh paper; these slides have since been converted to black-and-white and are shown herewith.

We hope that the Membership will find this Seminar to be both interesting and informative.
