8 DAY WEIGHT DRIVEN MOVEMENT FOR MASSACHUSETTS SHELF,
GRANDMOTHER AND SIMILAR CLOCKS
Made in Massachusetts, by New England craftsmen

FEATURES:
Heavy brass plates, cut steel pinions, burnished pivots, cut brass wheels, cast brass suspension bridge, polished brass faced 3" diameter lead pendulum bob on cast brass slide, saddle board mounting, four dial pillar holes.

SPECIFICATIONS:
Movement, 2 5/8" wide, 4" high.
Recommended case depth, 3" min.
Pendulum dimension, from center of dial to tip of pendulum:
12 1/2" for Mass. Shelf case.
22 7/8" for Grandmother case.

MOVEMENT ONLY: Furnished with brass cable, pulley and hand washer. (no hands)

MOVEMENT COMPLETE: Includes brass cable, pulley, hand washer, pendulum, weight, hands and winding crank. The Massachusetts shelf movement is furnished with a horizontal bar type weight suitable for the Massachusetts shelf case. The Grandmother movement is furnished with a trapezoidal lead weight. A brass cased cylindrical weight is available at extra cost.

Our movement is a close replica of that made by Simon Willard in 1796. There are many Willard movements giving excellent service today, having been made some one hundred and seventy five years ago. We have every reason to believe ours will last just as long and thus it is very appropriate for use in a clock which, it is hoped, will become a family heirloom.
